ABSTRACT

Astrology is a science based on Veda, Bhraman and Puran scriptures which deal with mysterious way of study that searches the past, present and future prediction. A man by birth may be influenced by the position of the stars (Nakshetra) and planets that may give the fruits according to his Karma already done in the pre- birth and in the present movement. This study has tried to show the relationship of medical and astrological science to clarify how the planets are responsible to produce cancer in the person. It, too, displays the relation between the astrology and the cancer disease. It is seen throughout the study of the cancer in the 11 persons who have been attacked. In this study, the lung-cause-factor Chandra is getting suffered in the Native's (Jataka's) Kundali (Birth-chart). And the Jupiter (Brihaspati) is given the full sight with the sinful planet on the Lagna. The Lagnes (Lord of 1st house) is in the disease house. So this Native (jataka) susceptible of the lung cancer is found to be a lung cancer C 34. Similarly, the Lagnes and the Astames (Lord of 8th house) is in the 12th Bhava (12th house). The speech causal factor Mercury (Budha) is in the Pisces (Mina Rashi). The Sani-Mangal-Yoga (Saturn and Mars with together) is there where Saturn (Sani) sees the disease house and the Lagna being fully sighted by the Saturn- the speech- cause -factor, the lip-disease is susceptible and suffers with cancer of lip C 00. The Native's (Jataka's) Lagnes is in the week's position. According to the Kala-Purush Kundali, the cervix area has the Mars (Mangal) and Venus (Sukra) in Lagna and Navamsa Kundali (Birth-chart) respectively. The Sani-Mangal (Saturn and Mars) have reciprocal position with the Jupiter (Brihaspati) and the Saturn and Jupiter are in same house and the Native suffered from cancer of cervix uteri C 53. The Mars and Sun (Surya) situated at disease house. The Venus, Lord of 6th with Rahu is fully sighted by Ketu. Saturn and Moon lie as Sani-Chandra- Poisen –Yoga (Saturn and Moon in the same zodiac sign) in the 11th shown by Rahu. Lagnes is in 12th house seen by Mangala (Mars) in Lagna Kundal. Saturn and Jupiter are present in the same house (zodiac sign) in Navamsa Kundali. 7th house is victimized by Mars and Ketu, which is indicator of cervical part in Kal-Purusha Kundali. So the woman being suffered with such condition leads to the susceptibility to the cervical cancer C 53. The Sani-Chandra have poisonous Yoga (Saturn and Moon in the same zodiac sign). The Jupiter (Brihaspati) and the Saturn (Sani) have the reciprocal sight. According to the Karkat Rashi (cancer Zodiac) in the Kal-Purusha Kundali, The susceptibility is to the carcinoma of the breast C 50. The sperm and - causal factor Venus (Sukra), ovum – causal factor Mars (Mangala) being with the Sun (Surya) and Ketu, which gets suffered by Rahu.. The Mars, Venus, Sun and Ketu are fully sighted by the Rahu. The ovary causal factor Mars (Mangala) and Moon (Chandra) making Chandra-Mangala Yoga in the house of Saturn and fully observed by the Rahu. And the Mars (Mangala) sees the 8th and 12th Bhava (8th & 12th house). According to the Kala-Purusha Kundali and astrological point of view, the Native (Jataka) is susceptible with ovarian cancer C 56. In the Lagna –Kundali, the Mars - Jupiter (Sani-Brihaspati) have the reciprocal sight. In the Navamsa. Moon-Mars (Chandra-Mangala) having the reciprocal sight. The Navamsa has the second Bhava (second house) and the Lagna's Kundali is the Taurus (Bris-Rasi) has the Sani (Saturn) and the toungue-couse Sani (Saturn) may happen to cause the tongue-disease, that changes into tongue cancer C 02. The Astames (Lord of eighth house) Jupiter (Brihaspati) is in the Lagna and the 12th Lord Moon (Chandra) with Ketu is weak. The Lagnes is in the sixth house which gets suffered by the Saturn's third sight. According to the Kala-purusha Kundali, this Bhava (house) represents the legs that may get susceptible to the disease. Similar is the case that the Lord of the sixth house Saturn (Sani) in the 4th house which observed the Lord of the 8th Bhava Guru (Jupiter) by Sani's (Saturn's) tenth fully sighted. In Navamsa Lord of sixth (Lord of disease house) Mars situated at Baya-Bhava (12th house). The Jupiter-Saturn-Rahu observed by the Mars may have the leg cancer C76. In the Lagna Kundal, the Lagnes Sani (Saturn) Rahu and the Moon (Chandra) situated at same house and fully sighted by Ketu. Lord of sixth and the eighth Bhava has the house of the Mars (Mangala). The Jupiter is in the sixth house (disease house). The Jupiter having full-sight-power on the Sani (Saturn) and the Rahu. In Navamsa, Lagnes Guru (Jupiter) is affected by Rahu. Mars - Rahu situated at Saturn's house (11th) is suffered by Saturn. Sani-ChandraYoga in Mars' house(2nd) is fully sighted by Mars. Chandra-Mangala (Moon-Mars) are victimized in both Kundalis. The Moon (Chandra) is the white-blood- cell causal- factor and the Mars (Mangal) is the red-blood cell (RBC)- causal- factor, so, the blood cancer may occur and this Native (Jataka ) is found suffering from the blood-cancer C95. The fourth Bhava has suffered from the Rahu, in both Kundal. The Mars (Mangala) is situated in the Trik Bhava like sixth and twelve house. Mars and Saturn has got reciprocal sight in Trik Bhava.. The Mangala is the cause-factor of the Kidney and the fourth Bhava is the Kidney areas according Kal-Purusha Kundali. Later it gets affected with the Kidney cancer C 64. The Lagnes Jupiter (Brihaspati) gets suffered with the Ketu with the Saturn (Sani) in full sight. the Guru (Jupiter) and the Rahu have the reciprocal sight. Lord of 8th is the Moon fully sighted by Rahu. Roges (Lord of disease house) Venus (Sukra) is victimized by Saturn. In the Navamsa Kundali Roges (Lord of sixth) Saturn situated at seventh house, Lagnes in the 12th house, Lord of 12th in the disease house. Accordingly Kala-Purusha's 7th house is related with cervical part that may get suffered from the disease cancer of cervix uteri C 53. Finally, it can be concluded that the Lagnes being in the Trik Bhava where the sinful planets observing the Sani and the Brihaspati in the same Rasi (Saturn and Jupiter in same house) and the Sani and the Brihaspati having the reciprocal sight may ensure the affected part susceptible to the cancer.

INTRODUCTION

According to the world Health Organization, every year 1 crore and 10 lakh people are seen to have been suffering from the cancer and more than 75 lakh die from the cancer. At the present world, the thirteen percent of the death is the cause of the cancer has been a recent public health problem (Cancer Education Manual B.P. Koirala Memorial Cancer Hospital, 2009). Cancer is a non-communicable chronic serious fetal disease. There are many important factors for this disease to appear. Although the main cause of how this disease arises is not known, the research made up to the recent time, among the reasons 90 percent reasons are of environmental circumstances. Under these conditions, consumption of the unhealthy foods, life-style and the adverse effects of environmental factors are seen the prominent factors. Along with this 10 percent, cancer can arise because of the internal factors like age, gender, and hereditary character. Among many external circumstances, tobacco and the food-ingredients related with this like alcohol, radiation and the polluted work-factors virus-parasites, bacteria. Among the reasons mentioned above, the tobacco-consumption is the main factor of the cancer-appearance. In the society, the males take the tobacco more than the females. But it has been found that the females have been suffering from cancer more than the males. Quite enough those who use the cigarette and the tobacco-related things may not get attacked through cancer but those who don't use these things have been suffering from the cancer. Besides these elements, those having exposure to the different circumstances mayn't get cancer and at the same time, the innocent children who don't take these things, too, seem to suffer from the cancer.10 percent cancerous disease occurs as is seen to be the factor of the age, gender-heredity, and the cast (race). No matter what is expressed above about the cancer-disease, the immunity power of the man is the main responsible factor to cause the cancer. Weakening immunity power in the body can make the patient susceptible to the cancer-hazardous-disease. Regarding, the context of the disease, cancer is the chronic disease from the evolution of the universe, there are 12 zodiac-signs (Rasi) and 27 stars (Nakshetras) may be the Karkata may have come into the power from the name, the Karkata Rasi (cancer zodiac sign) is accepted. The Sanskrit word 'Aburda' is called 'cancer' in English.

From another side, the largest and the oldest animal is the dinoasur which got the cancer as the medical diagnosis has proved through the study of the Egyptian fossils thus the factors of the cancer has to be considered from another side. The good and the bad aspects of the planet for the prediction of the past, present and the future are intricately explained. Therefore, the possibilities and the reasons can be explained on the reasonable basis of the astrological study can help cure the cancerous disease. From the point of view of those suffering from cancer, the horoscopes may have different position of the planets that may have influence on causing the cancerous disease.

MATERIALS AND METHODS

The random sampling of the patients who come to hospital for cancer treatment has been made hereby in the study. The use of the horoscopes given by the patients themselves and by their relatives has been made a main tool in the study of the medical astrology. The astrological study bases on the date and the time of the patients, for which the calendar is taken as determined by the Nepal Panchaga Nirmayak Committee. Mainly, there have been prominently used the Lagna and Navamsa Kundali.

Limitation of the study: This study has the inclusion of random sampling of the 11 persons having the cancer disease. The horoscopes are made on the basis of Siddhanta Jyotish (Principle of astrology) and predictions have been done on the basis of the Falit Jyotish (Art and science of prediction philosophy by astrology). The anatomical structure of the human body and biology, medical science and religious and Shastriya (classical) point of view have been made to make the Kala- Purusha Kundali. This study being the inclusion of 11 cancer-patients may not fully be accepted in general but it is hoped to be an extra study and research from the point of astrological prediction science. The person is likely to be susceptible to the cancer.

**DISCUSSION**

Astrology is a science that can be taken as the mathematics. In the context of the cancerous study, the planets as in the high or low, good and sinful, friendly and the unfriendly have the effect on the nature. Lagna is paid most attention in this regard. The Lagna is related with the form and the colour and the quality (Practical astrology, Kuber Nath Bhattrai, Ratnapustak Bhandar 2011). The Lagna and Lagnes as if remaining powerful can make the Native (Jataka) strong and Powerful and healthy. Similarly, the Lagna and the Lagnes being make seen by the sinful planets in the Trik Bhava. The immunity power is weakened. As a result, many kind of disease may catch the Native. The Lord of the Trik Bhava is in the Lagna, the cause i.e. Karaka planet is tortured. The sinful planets in the Trik related, many planets in the Trik Bhava related with the chest and the lung-cause-Chandrama, the white blood-cell related factor planet-Chandrama (Moon), the red blood cell-cause-factor is Mars (Mangala). The uterus base's cause and the sperm production area is of the Venus (Sukra). If these planets being worsened in the Kala Purusa Kundali, the Graha-Gochar-relationship is susceptible to the disease. The main-reason of how the cancer occurs hasn't been clarified up to now. The Graha-Gochar is the helpful reason. From this, the cancer is the susceptible to the astrological planets are to studied which is of necessity. In this study, the Lagna being weakened, the lord of Trik in the Lagna is considered to be fruitless. Saturn and Jupiter in same zodiac sign or reciprocal position. The life- giving -force is the Jupiter being in the weak place and being given full sight by the Saturn. In such varied cases disease cancer is likely to occur.

**Conclusion**

The Lagnes being in the Trik Bhava where the sinful planets observing the sani and the Brihaspati in the same Zodiac signs and the Sani and the Brihaspati having the reciprocal sight may cause the affected part susceptible to the cancer.
